

Buffer and Abutters list in GIS Viewer

NOTE: There are two ways that you can buffer **By Shape** tab or **By Spatial** tab.

1) Buffer “By Shape”

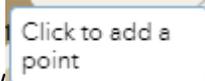

In the “By Shape” tab select **Parcel ID Search By Parcel**.

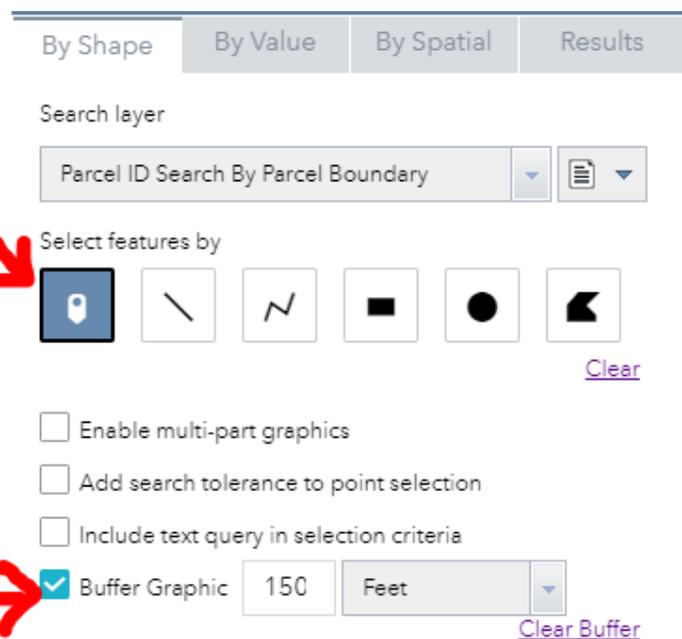

For the “Select features by” use the **Point** for a single parcel and for buffering around multiple parcels use other feature to select (ex. Line or Polygon).

Click the box next to the **Buffer Graphic** and type in whatever size buffer you want around your property.

You will see this message next to your

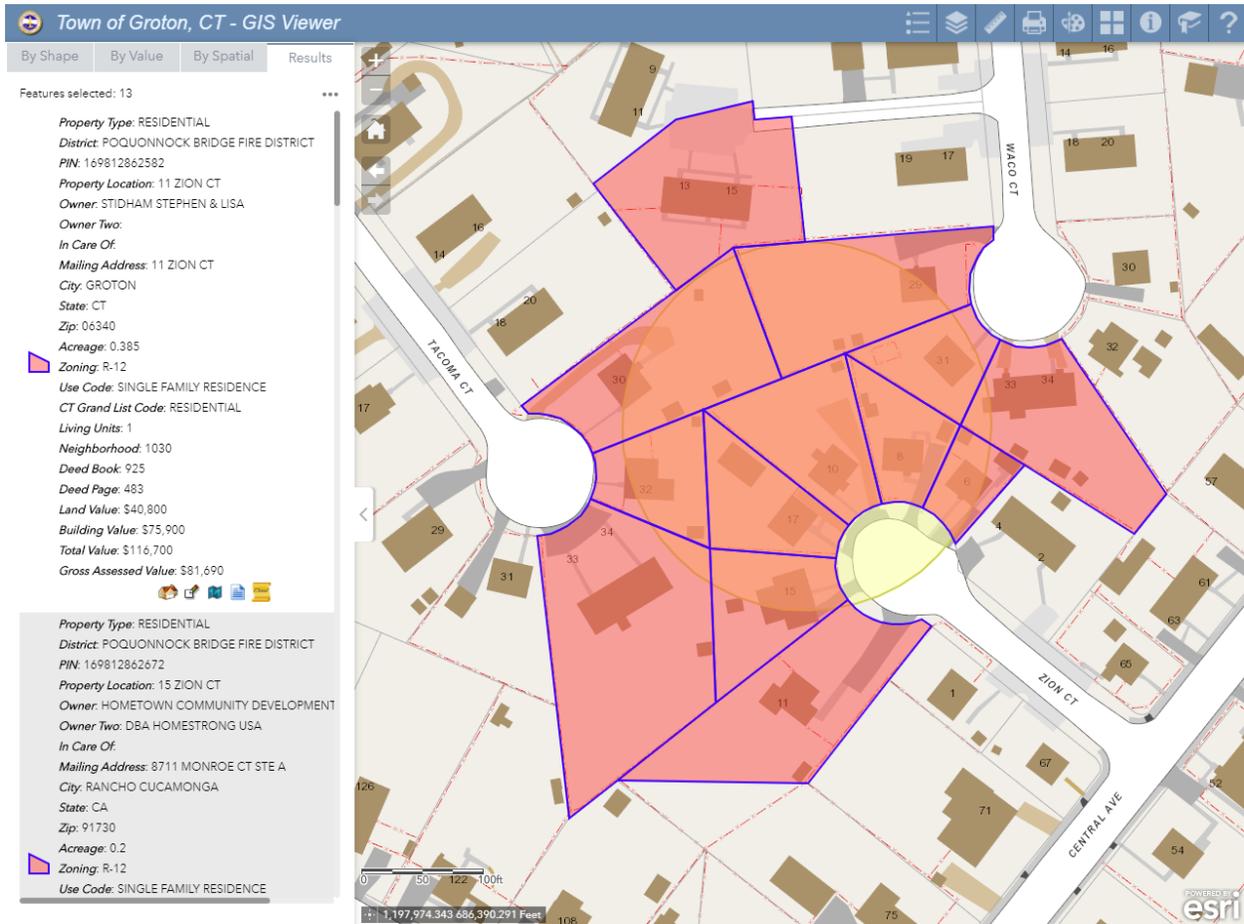

mouse arrow. Now click on the parcel you want to select

and run the buffer around.

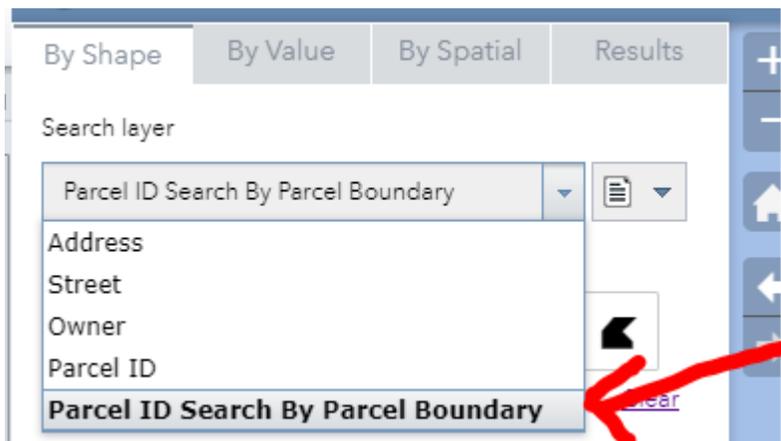

Example of what your screen will look like.

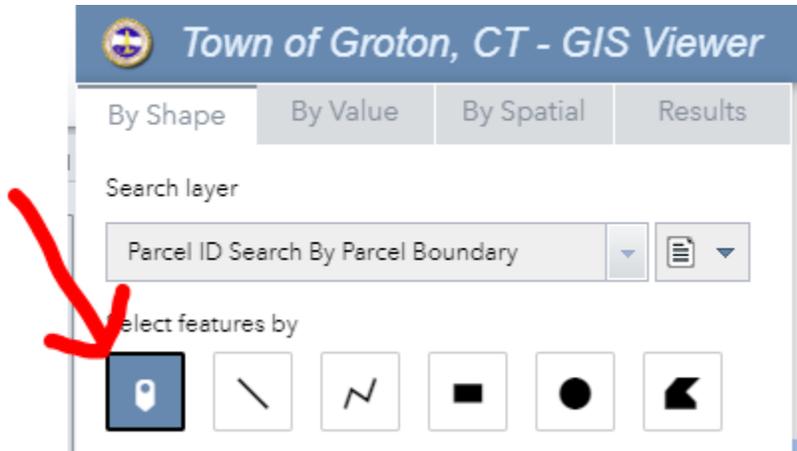

To select ALL the addresses in the parcel (Example: apartments, 2 families, etc.) scroll down to, step 3. If you just want the overall parcel address Export your results now, and to do that scroll down to step 4 Exporting Results.

2) Buffer “By Spatial”

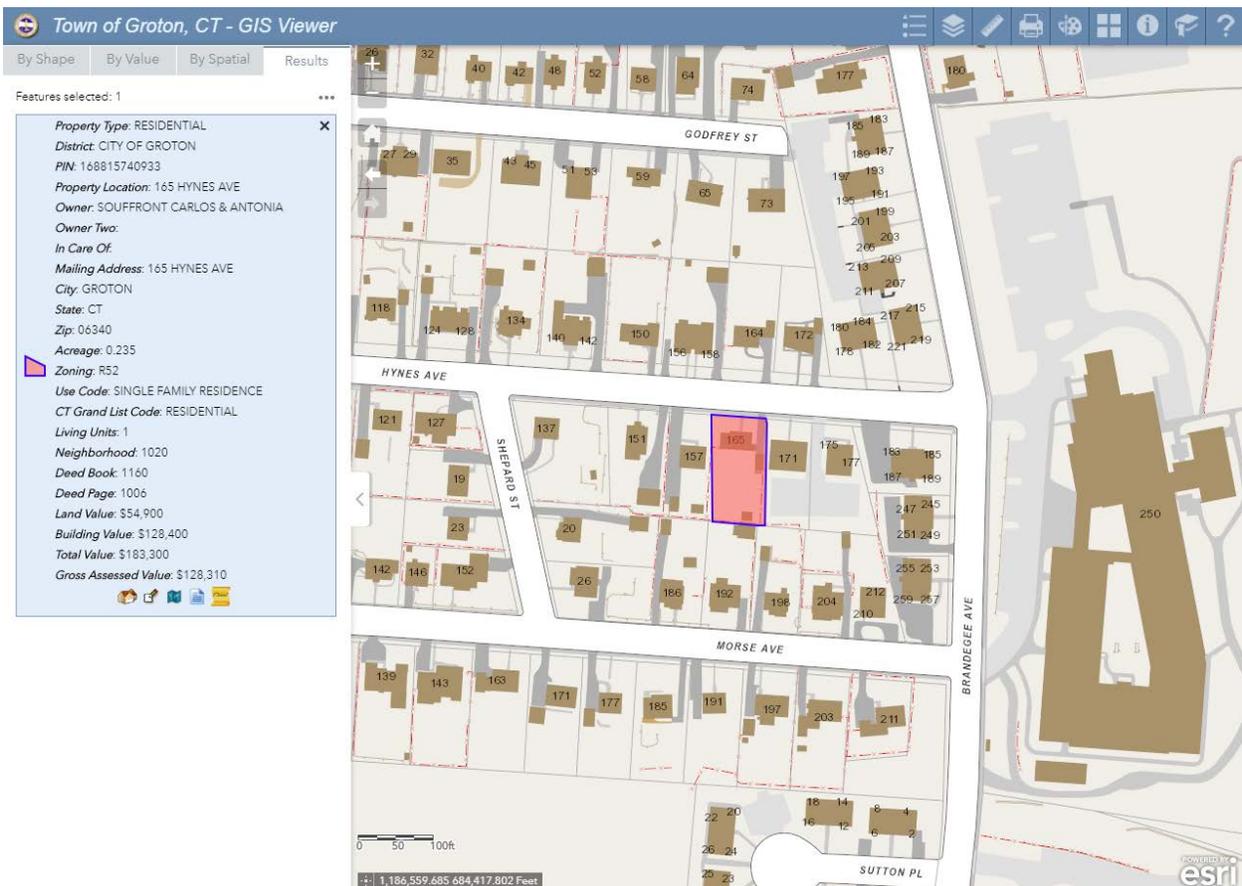

In the “By Shape” tab select **Parcel ID**
Search By Parcel.

“Select features by” use the **Point** for a single parcel. For multiple parcels use other feature to select (ex. Line or Polygon).

Select the parcel that you want to do your buffer around. The parcel should be highlighted in red, example below.

Go to the "By Spatial" tab. Type in whatever size buffer you want then click on the **Apply Buffer** button, Red arrow below.

By Shape By Value **By Spatial** Results

Optionally apply a search distance:

300 Feet  [Clear Buffer](#)

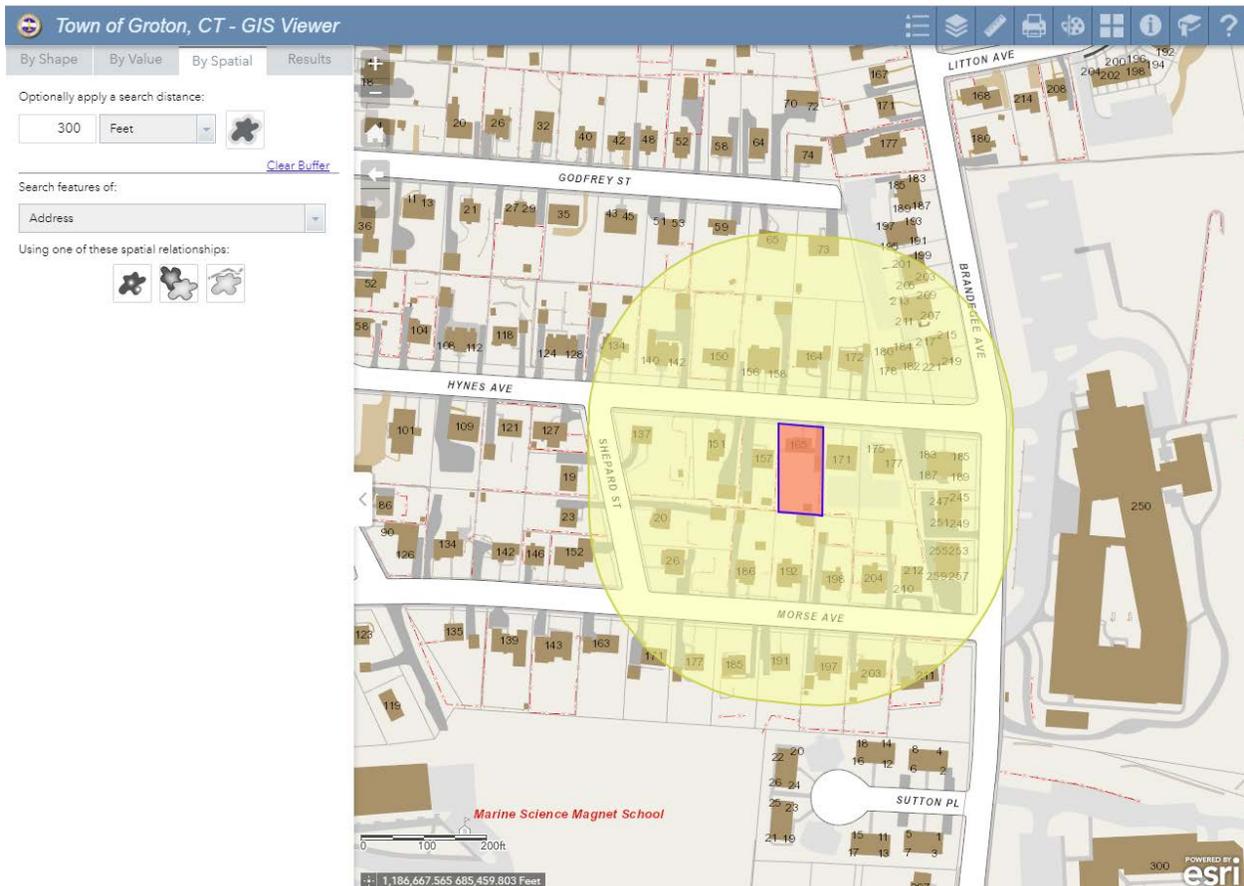

Search features of:

Address

Using one of these spatial relationships:

Example of buffer results, buffer is shown in yellow.

Under the “By Spatial” tab select **Parcel ID Search By Parcel** for the “Search features of”.

By Shape By Value **By Spatial** Results

Optionally apply a search distance:

200 Feet 

[Clear Buffer](#)

Search features of:

Parcel ID Search By Parcel Boundary

Address

Street

Owner

Parcel ID

Parcel ID Search By Parcel Boundary

Then click on the “intersected by” button, highlighted in yellow.

By Shape By Value **By Spatial** Results

Optionally apply a search distance:

300 Feet 

[Clear Buffer](#)

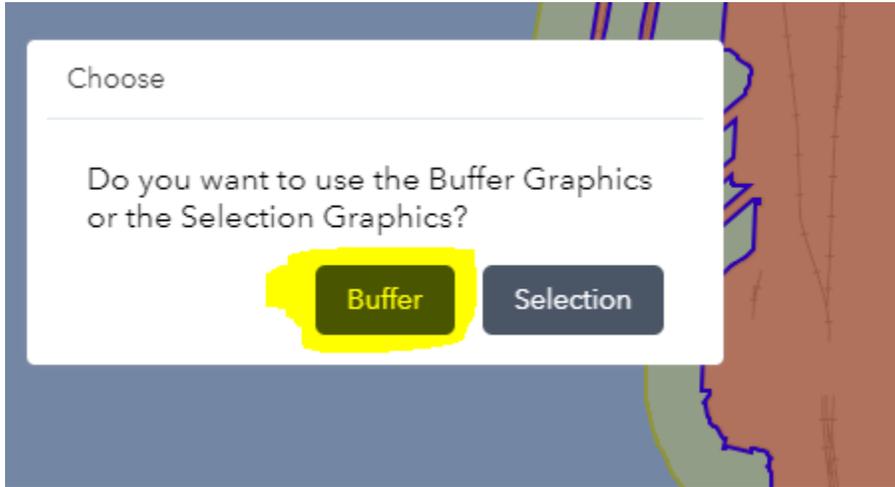

Search features of:

Parcel ID Search By Parcel Boundary

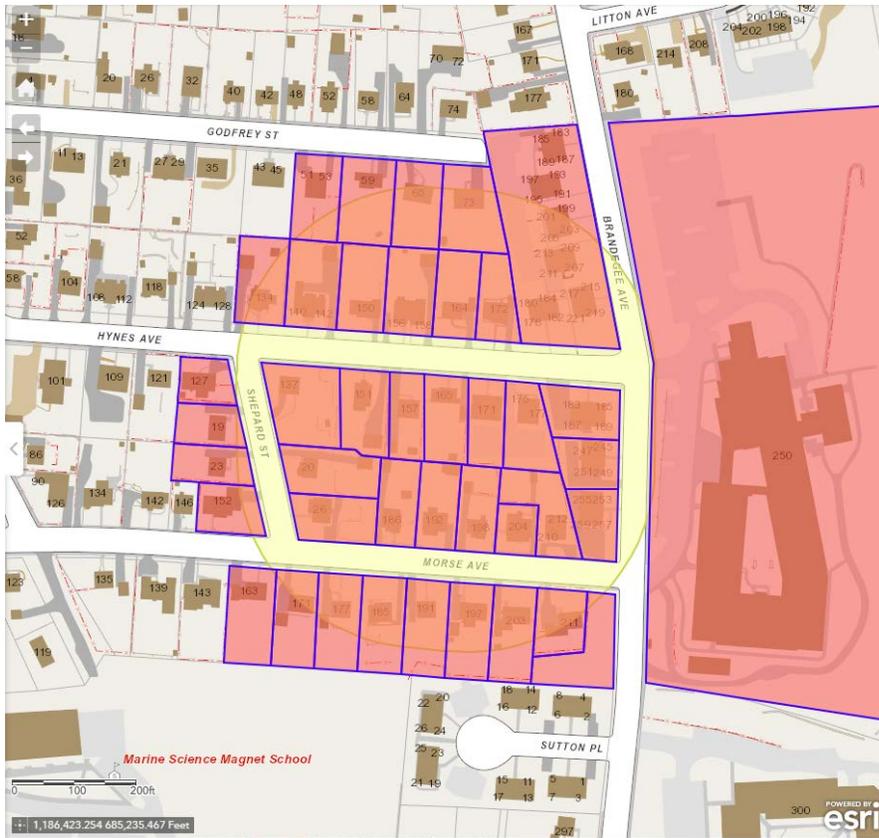

Using one of these spatial relationships:

Choose window will be on your screen select **Buffer**.

See results below.

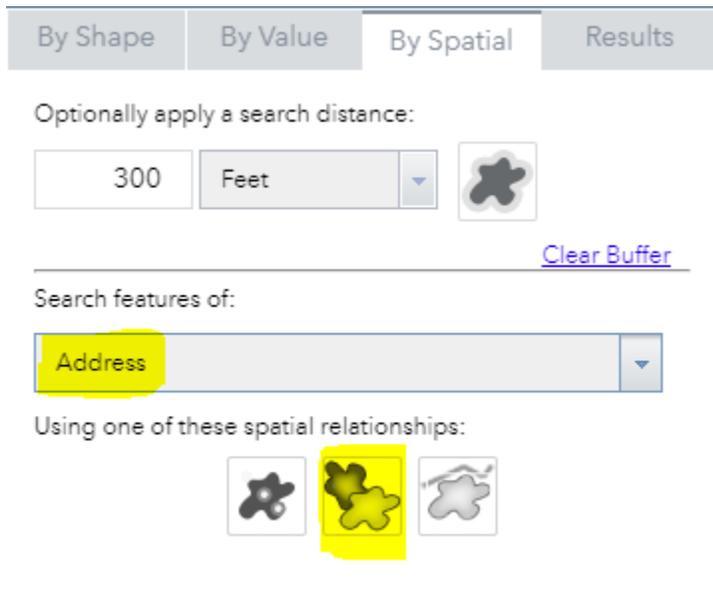

To select ALL the addresses in the parcel (Example: apartments, 2 families, etc.) scroll down to, step 3. If you just want the overall parcel address Export your results now, and to do that scroll down to step 4 Exporting Results.

3) Selecting all Addresses

Go back to the “By Spatial” tab and change the “Search feature of:” to **Address** now.

Then click on the “intersected by” button again.

By Shape By Value **By Spatial** Results

Optionally apply a search distance:

300 Feet 

[Clear Buffer](#)

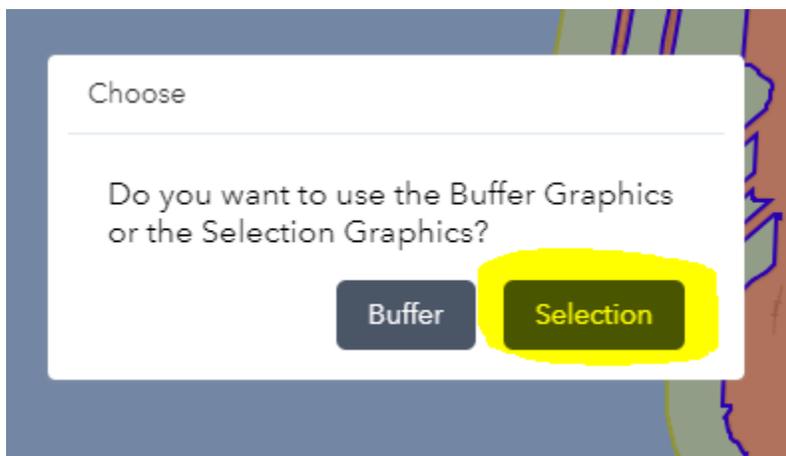

Search features of:

Address

Using one of these spatial relationships:

 **** 

Choose window you want to click on “Selection” this time.

Choose

Do you want to use the Buffer Graphics
or the Selection Graphics?

Buffer **Selection**

See results below.

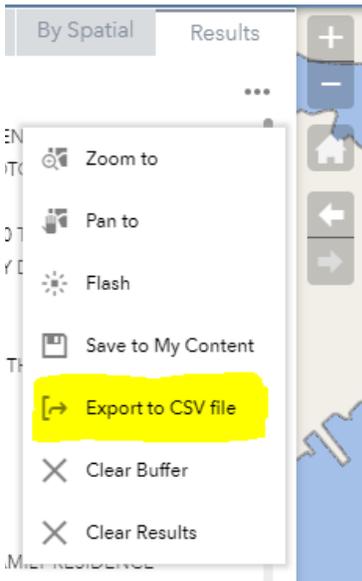

4) Exporting Results

To export the data click on the 3 dots (...) shown in yellow in the picture below.

Select the "Export to CSV file".

CSV File Example

The screenshot shows a Microsoft Excel spreadsheet titled 'Search Results (3).csv'. The spreadsheet contains a table with columns for Property Type, District, PIN, Property Location, Owner, Owner Two, In Care Of, Mailing Address, City, and State. The data is organized into rows, with the first row being the header and subsequent rows containing property details.

Property Type	District	PIN	Property Location	Owner	Owner Two	In Care Of	Mailing Address	City	State
RESIDENTIAL	CITY OF GROTON	1.68812E+11	59 GODFREY ST (CITY)	DUNKERLEY HENRY M JR & RUTH D			59 GODFREY ST	GROTON	CT
